

4th May 2020

Dear partners, customers, suppliers,

Faced with the unprecedented situation and rapid evolution of **COVID-19**, the **CODIBEL** group took the decision in **March 2020** to ramp up its production activities to supply hydro-alcoholic hand sanitizers as a priority to hospitals and pharmacies. Five products have been approved by the Belgian **FPS Public Health** under the accelerated procedure for biocide registration.

With the partial relaxation of the current confinement measures now in place, we know that the demand for these products will increase, in view of the crucial role they play in limiting the spread of the **Corona-virus**. We are therefore actively extending the supply of these products where they are the most needed, everywhere from shops, schools, dentists, factories, to hairdressers...

Our factory is applying all the necessary safety precautions in order to keep operations running as normally as possible during these complicated times. This is possible thanks to the professionalism of the **CODIBEL** team, entirely committed to the role the Company is now playing in the fight against the **COVID-19** pandemic.

We are pleased and proud to be actively contributing to providing essential supplies where they are the most needed. Please feel free to contact us directly if you need hydro-alcoholic gel or disinfectant liquid.

Take care of yourselves and your loved ones,

Best regards,
Michel Knops
CEO
